DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6, 9-13, and 27-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following recitations lack antecedent basis: "said female member" in claims 6, 9-12, 30 and 31; "said latch means" in claim 27 and "said male member" in claim 30.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 25, 26, 31 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilkins (U.S. patent no. 5,325,890). The patent to Wilkins discloses a flow connector comprising first and second flowpath components (1, 2). The first flowpath component (1) includes a sealing member (5) movable between a first position in the flow path preventing fluid flow and a second position out of the flow path

permitting fluid flow, see Figures 1-3. Latch means (43) couples and actuates the component (1) with the component (2), see Figure 4.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Steydle et al (U.S. patent no. 4,029,125). The patent to Steydle et al discloses a flow connector comprising first and second flowpath components (1, 2). The male flowpath component (2) includes a sealing member movable between first and second positions preventing and permitting fluid flow, respectively, see Figures 2, 3 and 6.

Allowable Subject Matter

Claim 34 is allowed.

Claims 12 and 14-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13, 27-30 and 33 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Connors and Roebelen, Jr. are cited for the additional showing of valve couplings including a sealing member movable between a

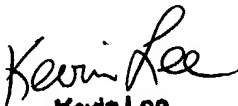

first position in the flow path preventing fluid flow and a second position out of the flow path permitting fluid flow.
